Blessings dear followers,

Firstly, as a disclaimer, I am not a health practitioner and I am not giving medical advice as such. However, I want to give people a fighting chance with any deadly virus that might become an epidemic or pandemic in the near future. I am doing this by revealing God's natural remedies for fighting disease in the body. This is by using colloidal silver and raw honey.

Both colloidal silver and raw honey are natural antibiotics, anti-fungal, anti-viral, and anti-inflammatory. They also both promote healing and REVERSE cellular damage. In preliminary studies, colloidal silver has even been shown to reverse cancer cells—silver does not kill the cancer cells like chemo-therapy—rather it returns the malignant cells back to their normal benign state.

And so, how would I use colloidal silver and raw honey if I came down with a deadly virus? Here is the regimen that I would do:
1) Drink 2-3 ounces of colloidal silver in the morning and 2-3 ounces in the evening.

For the past few years, whenever I feel like I might be coming down with a cold or the flu, I immediately take colloidal silver and it has always knocked it out. Also, one of my pets was cured from a deadly illness by taking colloidal silver.

You can make colloidal silver at home (there are many articles online on how to do this), but I would rather buy colloidal silver from a trustworthy source as I do not have the equipment, etc. However, if any deadly virus really does become a pandemic, it might be a good investment to learn how to create colloidal silver on your own as you might run out. Also, to my knowledge, colloidal silver does not expire.

**Purevon Silver in a Bottle (16 oz.)** – this the cheapest colloidal silver that I could find that is authentic in the U.S.; I believe that they can ship in bulk overseas—you will need to call them to ask [https://purevon.com/colloidal_silver](https://purevon.com/colloidal_silver)

2) At every meal, take a spoonful of RAW honey with a few nuts.

Our Lord, Jesus Christ, said to Catholic seer, Luz de Maria, that a spoonful of raw honey with a few nuts contains all the nutrients that the human body needs to survive. He recommended it for the future famine. I am recommending RAW honey with nuts because it will accelerate healing in affected cells and related infections. It needs to be RAW honey so it will still have all the beneficial properties intact. The raw honey should work well with the colloidal silver in fighting off most diseases. Also, raw honey never expires.

3) Take a couple of drops of nascent iodine every day.

Iodine is necessary for every cell in the body. It helps to fight off disease and balance body chemistry. It also helps the body to flush out all harmful toxins. I take half a dropper of nascent iodine daily as part of my daily multivitamin routine.

I recommend getting one bottle of iodine from the Infowars Store as it is the most potent and effective iodine available at a reasonable cost: [https://www.infowarsstore.com/survival-shield-x-2-nascent-iodine.html](https://www.infowarsstore.com/survival-shield-x-2-nascent-iodine.html)

Finally, do not just trust me on this writing. You need to educate yourself on both colloidal silver and raw honey before any deadly virus becomes an epidemic/pandemic and so, you can obtain these natural supplements before you or your loved ones get ill.

And above all, trust in the Lord and pray!
May each of you be blessed by Our Lord and Our Lady.

*I love you,*

—*a soul*
